

Call Number Ranges

The following Dewey call number ranges are suggestions for searching to help you locate titles on your topic. These ranges are not exclusive – there may be titles that fall outside of the given call numbers or overlap with other topics. If you find a suitable title and would like to find similar titles, you can also see how the subject is listed in Title Source 3 and/or TRACpac and do a subject search.

Many of the call numbers below have an asterisk (*). This is often referred to as a “wildcard” and represents any other numbers that follow. Therefore, 006.7* represents 006.7, 006.73, 006.756, 006.78586, and so on. The more numbers after the decimal point the more specific the call number is. These wildcards can be used in Polaris and Title Source 3.

Category: Technology/Computers

- Windows (PC), Mac Operating Systems: **004.16 – 004.1675** and **005.44***
