

How to add Facebook to your website

1. Create a side content item on your website by going to **Create Content > Side Content**. Give the **Title**, decide if you wish to **display the title**, and choose which side of your website you wish for it to be displayed on (**Block Location**). If you wish, you can alter the vertical placement of the side content on your chosen side by increasing or decreasing the **Block Weight**.

Create Side Content

 Images uploaded here should not be wider than 200px for Theme 01, and not wider than 238px for Theme 02.

Title: *

Display Title: *

no

Should the title of this side content piece be displayed?

Block Location: *

Left

Block Weight: *

5

Optional. On the side panel, the heavier items will sink and the lighter items will be positioned nearer the top.

2. In a new window, go to <https://developers.facebook.com/docs/plugins>. Click on **Like Box**.

Sharing Checklist
Follow our sharing best practices.

 **Sites Directed to Children under 13**
Read this important information.

Like Button
Let people share pages and content from your site back to their Facebook profile with one click, so all their friends can read them.

Share Button
Allow people to share to Facebook, share with particular friends or with a group. Alternatively, they can share in a private message.

Embedded Posts
Embedded Posts let you add any public post from Facebook to your blog or web site.

Comments
The Comments plugin lets people comment on any piece of content on your site.

Send Button
Let people privately send content on your site to their friends.

Follow Button
Let people subscribe to public updates on Facebook.

Activity Feed
Displays the most interesting, recent activity taking place on your site.

Recommendations Feed
Displays the most recommended content on your site.

Recommendations Bar
Let people like content, get recommendations, and share what they are reading with their Friends.

Like Box
A special version of the Like Button only for Facebook pages.

3. This will open up a box for you to fill out with your information and some customization options.

Like Box

The Like Box is a special version of the Like Button designed only for Facebook Pages. It allows admins to promote their Pages and embed a simple feed of content from a Page into other sites.

Your library's Facebook URL

Facebook Page URL <input type="text" value="https://www.facebook.com/ValleyviewMunicipalLibrary"/>	Width It can be no wider than 200 <input type="text" value="200"/>
Height <input type="text" value="The pixel height of the plugin"/>	Color Scheme <input type="text" value="light"/>

Show Friends' Faces **← Deselect**
 Show Header

Show Posts **← You can choose this, but it won't fit well**
 Show Border **Color Scheme, header and border are up to you**

Preview

[Get Code](#)

4. Once you're happy with your preview, click **Get Code**.

5. This brings up a box called **Your Plugin Code**. Click on the **IFRAME** button.

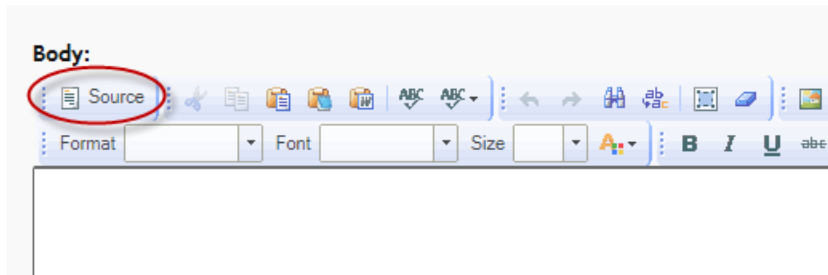

Your Plugin Code ×

Place the code for your plugin wherever you want the plugin to appear on your page.

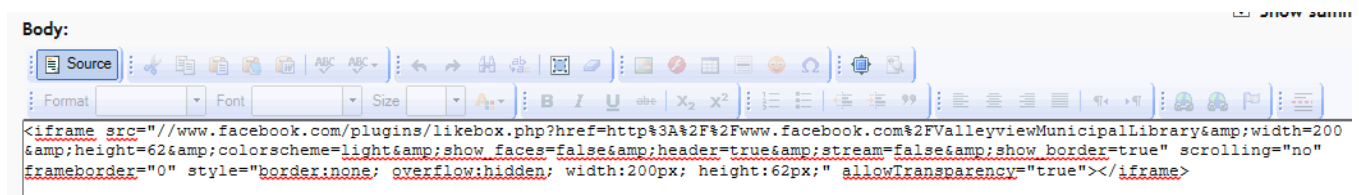

```

<?www.facebook.com%
2FValleyviewMunicipalLibrary&width=200&height=62&colorscheme=ligh
t&show_faces=false&header=true&stream=false&show_border=true"
scrolling="no" frameborder="0" style="border:none; overflow:hidden;
width:200px; height:62px;" allowTransparency="true"></iframe>
```

- Highlight everything in the box and copy it (control + C, or right click and select copy).
- Go back to the side content you created on your page and click the **Source** button below where it says **Body**.

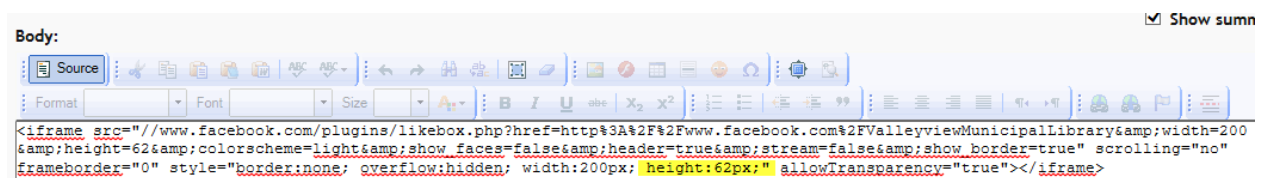

- You'll notice that the buttons are all greyed out now. This is okay. Paste in the code that you copied from Facebook by either pressing control +P or right clicking and selecting paste. It should look something like this:

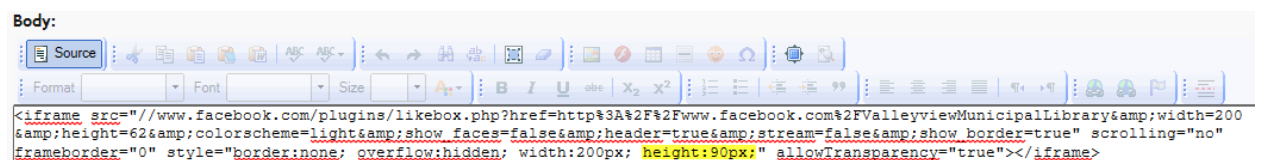

In the last line, where it says **height:62px**, change the 62 to 90px.

Before:

After:

- Scroll down to the bottom of the page and hit **Save**.
